The following information was procured from a letter sent via courier from Gdynia by the Subject. The letter arrived here on 30 May 1947.

It has been learned from the above source that TILESTONE proceeded to Poland as planned, arriving there o/a 19 May. Source also informs us that Subject did not make the trip with the aid of the Swedes, as indicated would be the case in our references a) and b), but proceeded by an illegal boat to Gdynia area. It was our understanding we were to have been informed re the final particulars of Subject's trip but it is assumed time and circumstances prevented any further contact previous to his departure. It is also assumed Subject's departure is unknown to the Swedish authorities.

Subject indicated the trip had been completed without incident and he had succeeded in contacting 2 representatives of the Supreme Committee for Lithuanian Restoration. It is also understood they had succeeded in bringing a considerable amount of valuable material which Subject is attempting to bring to Stockholm.

With respect to the pouch material which had been expected in Stockholm o/a January of this year, it has now been ascertained that this material is yet in the hands of a ship captain, who was unable to make delivery in Stockholm. This material will be picked up when Subject returns from Poland. The contents are now considered of minor importance by Subject as he now possesses more complete and up-to-date information than was contained in this pouch.

Subject's return has become increasingly complicated due to the activation of, what he calls, new Russian port restrictions in the area, becoming effective on 25 May. He has asked source to immediately dispatch a sailor to arrange contact with him and assist him in his return to Sweden. Source sent a man for this purpose on 31 May If all goes well, it is anticipated Subject will return to Stockholm o/a 9 June.

Upon Subject's return your requests in references c) and d) will promptly be taken up and the results forwarded.

In connection with references e) and f). we have now received the text of these reports from our source []. This information is without a doubt identical with the information Subject previously supplied to us. We think it handly highly unlikely that Subject is in contact with TICKTACK but feel it quite possible it was received from his Finnish or even Swedish source in Stockholm. Efforts will be made to ascertain thru what channels this information reached [].

The following are excerpts from a letter from J. H. D. dated May 30, 1947:

"The BDPS (General Democratic Resistance Movement) and the VPS (Guerilla Headquarters) are running smoothly, but the general situation is extremely tragic. Unbelievable terror exists on a tremendous scale. All bishops except Bishop Rainys and Bishop Paltarokas have been arrested. Additional arrests are being made of priests, teachers and students. Gigantic efforts are being made to obliterate the Lithuanian resistance movement, but it is too well organized and disciplined for that. There's only one way now - to fight until the end. To lay down our arms now would mean immediate moral collapse of the whole Lithuanian nation as has already partly happened to the Latvians.

"All over the country large-scale army movements are being made. They even surpass the movements of the Spring of 1941. Recently several artillery divisions, two tank and three infantry divisions were sent to the Klaipeda (Memel) - Libau district. The impression is that the Russians are seriously preparing for war. From the large concentration of military power in the coastal region, one can draw the conclusion that the thrust will be directed against our hosts."
